

# TRANSLOGI, INC

Our strength lies in understanding the real challenges of modern mobility-then solving them with practical, intelligent systems. We combine deep technical know-how with clear purpose, designing solutions that are precise, scalable, and ready for the demands of tomorrow.

## COMPANY OVERVIEW

# Who We Are: Your Global AI Security Partner

## Global Innovator

An international brand delivering cutting-edge security technology worldwide.

## Scalable Infrastructure

Providing stable, extensible, and long-lasting security infrastructure solutions.

## System Architect

Building seamless, collaborative, and highly efficient security ecosystems beyond individual devices.

# What We Solve: Addressing Critical Security Pain Points

The security landscape faces complex challenges that traditional systems often fail to address. TRANSLOGI focuses on overcoming these hurdles with innovative, AI-driven solutions.

- **System Fragmentation:** Incompatible components from multiple vendors.
- **Lack of Intelligence:** Traditional surveillance offers limited analytical capabilities.
- **Complex Maintenance:** High operational costs and difficult upkeep.

## OUR SOLUTIONS

# Integrated AI for Enhanced Security & Simplified Operations

## Seamless Integration

Unified solutions to overcome multi-vendor compatibility issues.

## Robust AI Reliability

Precise and stable detection technology, significantly reducing false alarms.

## Intelligent Monitoring

Transforming traditional surveillance into AI-driven smart monitoring.

## Simplified Maintenance

Easy-to-use and reliable designs that lower long-term operational complexity.

CORE VALUE

# Our Value Proposition: Built for Performance & Trust

## Industrial-Grade Hardware

Durable, high-performance hardware designed for extreme environments.

## Practical AI

AI technology that deploys quickly and delivers tangible results in real-world scenarios.

## Transparent Architecture

Clear, maintainable architectural design ensuring long-term system stability.

## 24/7 Operation

Engineered for continuous, round-the-clock vigilance and uninterrupted security.

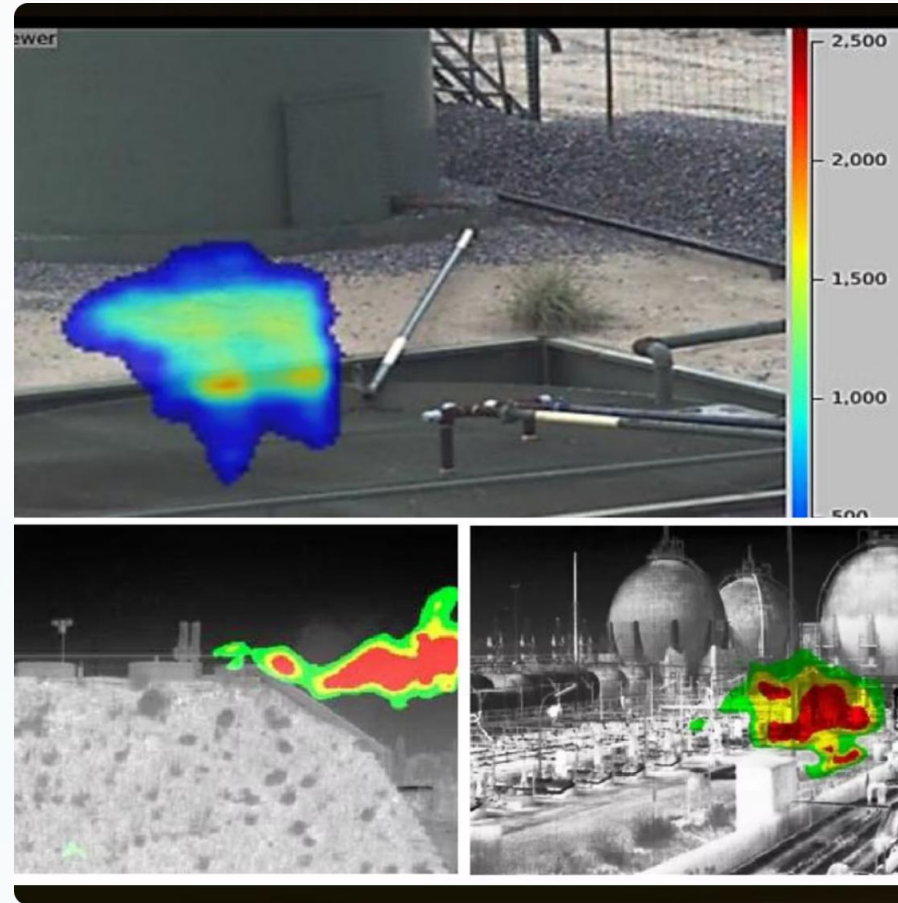

TRANSLOGI combines robust hardware with intelligent software, ensuring reliability and effectiveness where it matters most.

# Comprehensive Product Portfolio for Diverse Needs

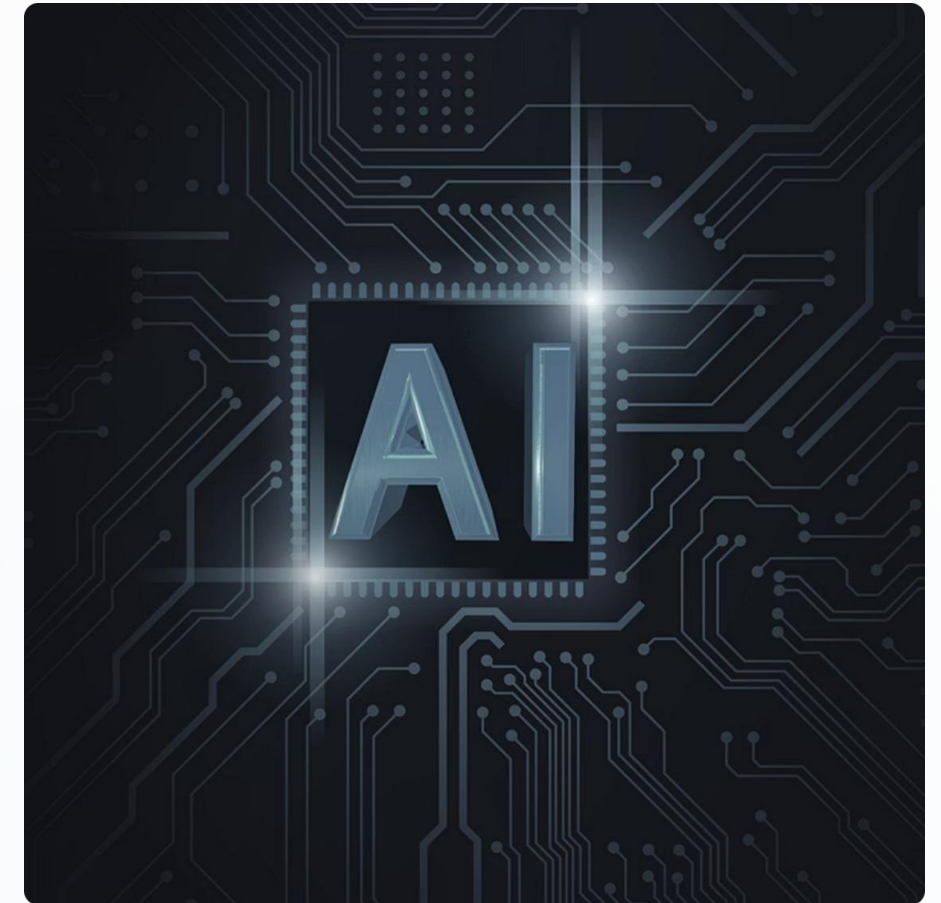

## Network Cameras & AI Camera

Bullet, dome, and PTZ cameras for versatile surveillance requirements.

## Thermal & Dual-Spectrum

Superior detection in challenging environments, day or night, and through adverse weather.

## AI Edge Server

Powerful edge AI boxes and industrial-grade networking solutions for distributed intelligence.

# Core AI Technology & Real-World Applications

## Technological Edge

- **Precise Human & Vehicle Detection**

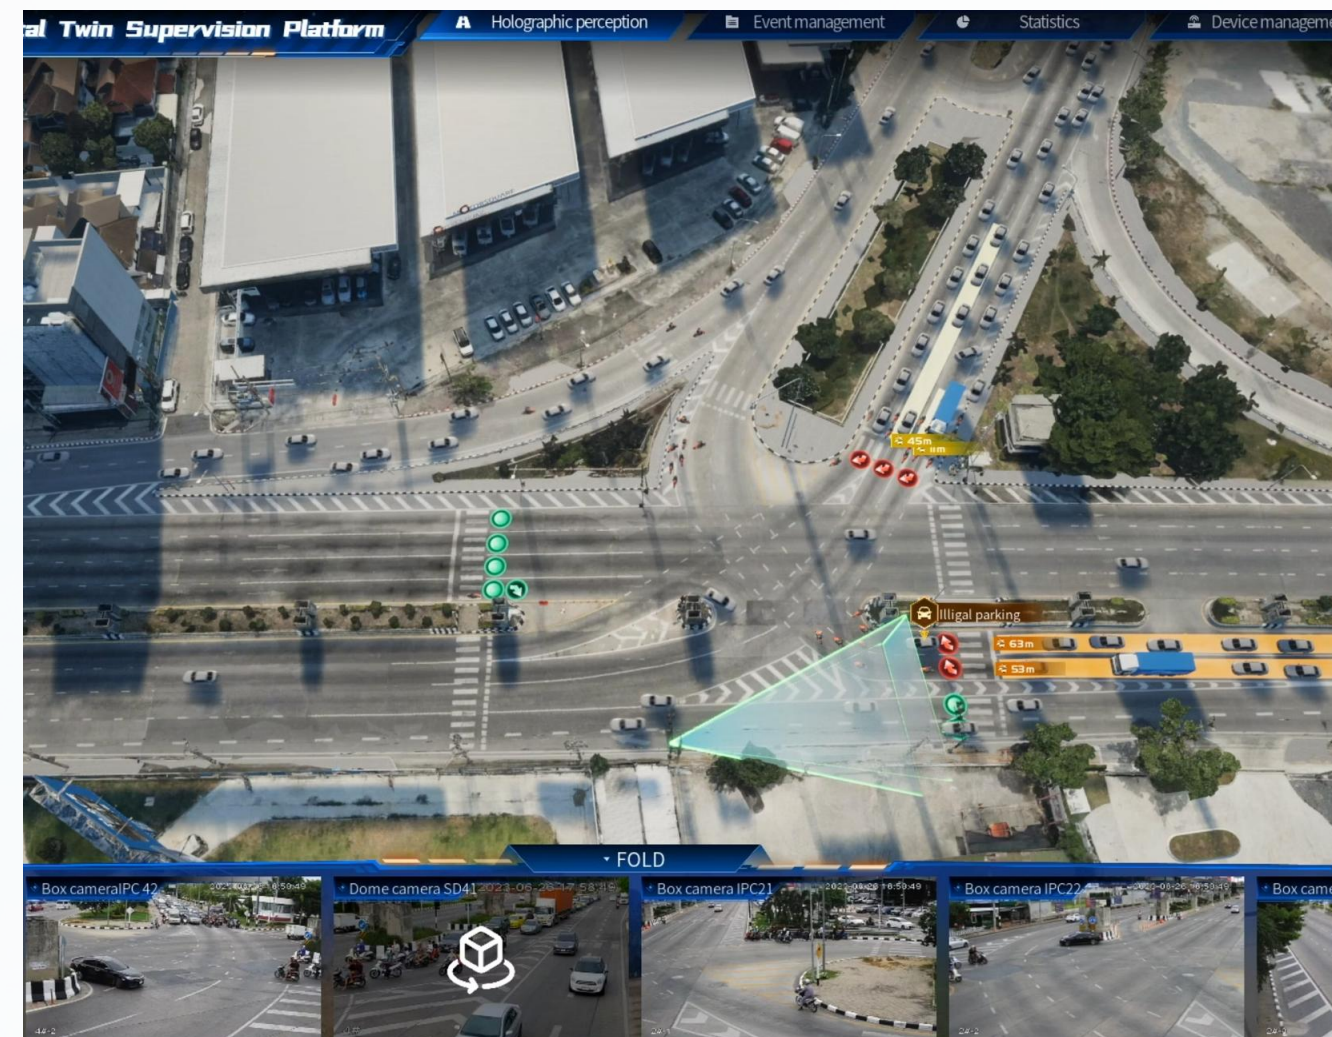

Accurate identification and tracking for enhanced situational awareness.

- **Proactive Behavior Analysis**

Real-time event identification and instant alerts for critical incidents.

- **Flexible Private Deployment**

Seamless integration with existing VMS systems and adaptable deployment options.

PARTNERSHIP

## Why Partner with TRANSLOGI?

### Deep AI-Hardware Integration

Ensuring high precision and optimal performance through tightly coupled AI and hardware.

### Tailored Customization

Providing bespoke solutions crafted to meet specific project requirements.

### Lower Total Cost of Ownership (TCO)

Achieving long-term savings through efficient, durable, and cost-effective investments.

### Compliance & Security

Adhering to global standards with robust data security and privacy protection.

# Project Cases

## Smart ITS Solutions

Vietnam Expressway

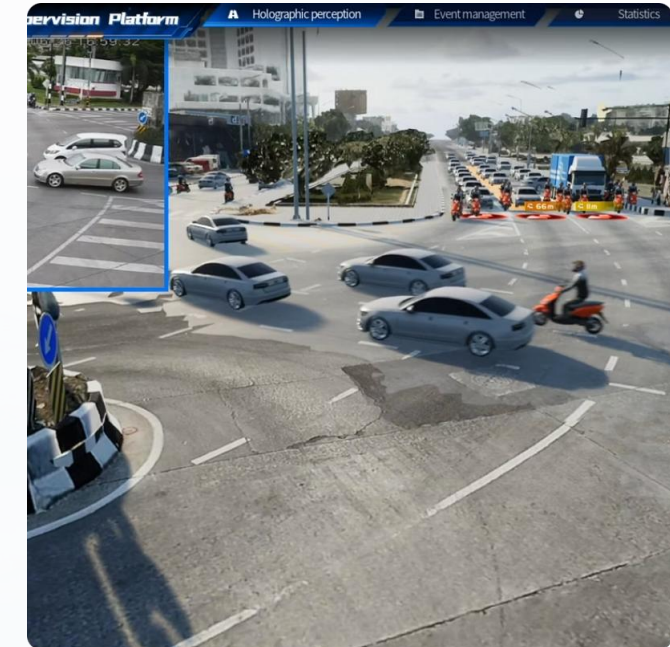

Intelligent Transportation System (ITS) solutions for Vietnam’s North–South Expressway, enabling efficient traffic monitoring and management.

## Airport Security Solutions

T3 Terminal, HCM Airport

Comprehensive intelligent security systems ensuring passenger and operational safety at airports.

## Smart Intersection

Bangkok, Thailand

AI-Camera & LiDAR fusion enables centimeter-level, real-time traffic perception and tracking.
